

COMMITTEES - PANELS

Becker to Henry Knoche, ExAsst to DDCI

1 Nov 1965 Sub: Proposed Panel on Info.
Sciences

Becker said he had suggested to Borel that a single panel be established to which the DCI could turn for responsible outside opinion and technical guidance on the general subject of information sciences.

He said he appreciated the DDI's need for outside consultative services on specific problems associated with the indexing of verbal information. However, He viewed this requirement as being but one task which could be assigned to an Agency panel having broader responsibilities. Accordingly, he proposed that an Info. Processing Panel be established as an advisory group to the DCI with functions that are Agency-wide. The IPP should have on it one person who is thoroughly conversant with the verbal info problems found within DDI.
